54/0 wide x 62/0 deep
2,094 sq. ft.

"Look at the size of this family room!!!! At just under 400 square feet this is the biggest family room we have ever placed in a 2200 square foot home. With the four bedrooms upstairs and this unprecedented family room you end up with the perfect family home. It also fits on a narrow lot .. Its only 40 feet wide. Add a 3 car garage and you have everything you could ask for... and its affordable too."
