3,120 sq. ft.

*"This four bedroom plus bonus room designs packs a lot of power from the moment you drive up to the front door. Shown here as an all brick design this house also looks magnificent with lap siding. The Family room adjacent to the kitchen is good sized and orients to the back yard. The formal spaces are smartly placed near the front of the house, and the three car garage enters on the side, preserving the strong unbroken facade."*
